SECTION 04: WIT FIRST-AID MEASURES

INHALATION: Move to fresh air. If breathing is difficult, give oxygen. If symptoms develop and persist, get medical attention. If not breathing, give artificial respiration.
SKIN CONTACT: Wash affected area immediately with soap and water. Remove contaminated clothing and footwear. If symptoms develop and persist, get medical attention.
EYE CONTACT: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If symptoms develop and persist, get medical attention.
INGESTION: If material is ingested, immediately contact a physician or poison control center. DO NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

SECTION 05: WIT FIREFIGHTING MEASURES

FLASH POINT: > 100.00 °C (>212°F) Closed cup
AUTOIGNITION TEMPERATURE: Not applicable
FLAMMABLE/EXPLOSIVE LIMITS - LOWER: Not applicable
FLAMMABLE/EXPLOSIVE LIMITS - UPPER: Not applicable
EXTINGUISHING MEDIA: Water spray (fog), foam, dry chemical or carbon dioxide. Use extinguishing measures appropriate to local circumstances and the surrounding environment.
SPECIAL FIREFIGHTING PROCEDURES: Fire fighters should wear full-face, self contained breathing apparatus and impervious protective clothing. Fire fighters should avoid inhaling any combustion products.
UNUSUAL FIRE OR EXPLOSION HAZARDS: This product is an aqueous mixture which will not burn. If evaporated to dryness, the solid residue may pose a moderate fire hazard. Closed containers may rupture (due to build up of pressure) when exposed to extreme heat.
HAZARDOUS COMBUSTION PRODUCTS: Upon decomposition, this product emits carbon monoxide, carbon dioxide, and/or low molecular weight hydrocarbons.
SENSITIVITY TO MECHANICAL IMPACT: Not available.
SENSITIVITY TO STATIC DISCHARGE: None necessary.
SECTION 06: WIT ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

ENVIRONMENTAL PRECAUTIONS: Prevent further leakage or spillage if safe to do so. Prevent contamination of soil and water.

CLEAN-UP METHODS: Keep unnecessary personnel away. Ensure adequate ventilation. Wear appropriate protective equipment and clothing during clean-up. Small spills can be absorbed with vermiculite, clay or other suitable non-biodegradable absorbent material, scooped up and placed in containers. For large spills dike ahead and collect liquid. Dispose of contaminated material as waste according to Section 13.

SECTION 07: WIT HANDLING AND STORAGE

HANDLING: Prevent contact with eyes, skin and clothing. Do no breathe vapor and mist. Wash thoroughly after handling. Use only with adequate ventilation. Keep container closed. Protect from freezing. This material should not be spilled, discharged, or flushed into sewers or public waterways.

STORAGE: For safe storage, store between 1 °C (33.8°F) and 37 °C (98.6°F). Below temperature limit the product will be irreversibly damaged and no longer usable. Above temperature limit the product properties change.

For information on product shelf life, please review labels on container or check the Technical Data Sheet.

SECTION 08: WIT EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

ENGINEERING CONTROLS: Work should be done in an adequately ventilated area (i.e., ventilation sufficient to maintain concentrations below one half of the PEL and other relevant standards). Local exhaust ventilation is recommended when general ventilation is not sufficient to control airborne contamination.

RESPIRATORY PROTECTION: Use NIOSH approved respirator if there is potential to exceed exposure limit(s). Observe OSHA regulations for respirator use (29 CFR 1910.134).

EYE/FACE PROTECTION: Wear safety glasses with side shields. Full face protection should be used if the potential for splashing or spraying of product exists.

SKIN PROTECTION: Use impermeable gloves and protective clothing as necessary to prevent skin contact.
